

SovranoCoin (SVR) is a revolutionary Proof of Stake (PoS) + Masternode based on the ZeroCoin blockchain with incredible anonymity, integrity and quality are the 3 pillars of a strong cryptocurrency. SVR differentiates itself from other cryptocurrencies by providing a fast, secure and stable platform to grow mass adoption globally. SVR is able to ensure that coin holders may store, send and receive coins anonymously and securely through the use of both desktop and mobile wallets.

SVR Coin is built as a modified fork of Goldiamcoin and has kept sustainability top-of-mind with SVR being a 100% Proof of Stake Masternode currency. At just 90 seconds, block times go incredibly faster than the parent Zerocoin, without having the negative environmental impact of high energy POW mining. As we continue, we will help you understand the core specifications, functionality and features of SVR Coin.

## KEY FEATURES

### **Sustainability :**

SVR uses 100% Proof of Stake for block generation thereby eliminating high energy utility incurred by Proof of Work mining.

### **High Proof of Stake Rewards :**

Block rewards will continue scaling down over time to curb inflation and keep supply low and fixed, which will prove to be very profitable for every investor.

### **Secure and Fast :**

As more SVR Masternodes are enabled, the network becomes more secure with faster transactions and more rewards. It is also notable to mention that we have a remarkable number of masternodes running already and entrant at any point put every user at an advantaged position.

### **Simplified POS Rewards :**

SVR Coin holders may simply leave their desktop wallet applications open to receive POS block rewards, it is that simple! Users don't have to do anything more than just hold SVR coins or run their masternode(s).

### **Global Transactions :**

Enjoy the ability to send and receive SVR Coin instantly across the globe using our desktop clients and mobile wallets. Currently our mobile wallets are under development and will be made available to users soon.

### **Anonymity Preservation :**

We know blockchain users have been yearning for total anonymity, more secure transactions and masking of addresses. We respond to this yearning with our project; private and fully anonymous transactions keep your wealth and identity safe and secure.

**Great Value :**

6,000,000 fixed coin supply will last over 15+ years generating material block rewards.

**Absolute Proof of Stake :**

On SovranoCoin, there are no hidden charges, no Proof of Work or unfair start. The process is very simple and transparency is our watch word. All coins burnt are made public, our explorers are readily accessible, our community contribute in some of our decision making, our customer support is efficient and our track record has given us an edge. All you have to do is simply mint coins by holding SVR in your wallet. The process is very energy efficient and comes with very low maintenance costs.

**Inflation Resistant :**

We take a lot of steps to make sure that we prevent inflation of any sort in our project, to ensure that our investors profit from their investment. Some of the measures we have taken to ensure this are: Masternodes locking coins, halving block rewards, incentivizing SVR holding with 0.8 MN/0.2 staking reward split. global adoption through utility as users can make purchases with SVR, Speed and Security.

# SOVRANOCOIN

# COIN SPECIFICATIONS

## Sustainability and Consistency

- Algorithm** - Quark
- Mining** - 100% Proof of Stake
- Block Time** - 90 Seconds
- Total Supply** - 6.000.000 SVR Coins
- Premine** - 110.000 (1.83%) SVR Coins
- Masternode** - 1000 SVR Coins
- Block Rewards** - 0.8 MN/0.2 staking
- Maturity** - 30 Minutes
- Max Supply** - 15+ Years

## BLOCK REWARDS (Longevity is paramount)

### BLOCK AND REWARD TABLE

Block	Reward
0 - 20000	0.7 coin (0.8 MN/0.2 staking)
20001- 40000	0.9 coin
40001- 60000	1.1 coin
60001- 80000	1.3 coin
80001- 100000	1.5 coin
100001- 120000	1.7 coin
120001- 140000	1.9 coin
140001- 160000	2.1 coin
160001- 180000	2.3 coin
180001- 200000	2.5 coin
200001- 250000	2.3 coin
250001- 300000	1.9 coin
300001- 350000	1.7 coin
350001- 400000	1.5 coin
400001- 450000	1.3 coin
450001- 500000	1.1 coin
500001- 600000	0.9 coin
600001- 700000	unlimited
	0.7 coin

### Note:

1000SVR = 1 Masternode

## **OPEN SOURCE CODE**

SVR Coin is a PoS + Masternode currency on Zerocoin as a parent platform. We decided to launch out on Zerocoin as the parent codebase because of its proven foundations, algorithm and efficient and transparent block reward distribution system. SVR Coin separates itself through longevity supporting coin specifications, customized QT wallets, explicit Masternode and POS wallet block rewards and an intentionally low maximum coin supply of 6,000,000 SVR Coins for value sustainability. All core codes for SVR Coin is completely open source and can be accessible on Github in a dedicated repository under the MIT License: <https://github.com/SovranoCoin>. Community members may use the available codes to create use cases of their own, and have full permission to do so whether these uses be for private or commercial use.

## **SVR MASTERNODES**

Although SVR Coin was developed as Masternode currency; however, it is optional to also secure the network without the requirements of a Masternode. As a result, Masternode holders will receive a higher block reward due to their securing the network through locking collateral. 1,000SVR coins will be required to secure the network with a Masternode. As more Masternodes are activated over time, more of the static coin supply will be locked.

Subsequently, running of more Masternodes also enables increase in transaction speeds. Ultimately, we strongly believe that taking into consideration these variables, a situation of hyperinflation almost becomes a non-issue.

## **DESKTOP WALLETS**

Because we are a global project, hence all three major operating systems in the world which are: Windows, Mac OS and Linux all have functioning SVR Coin desktop wallet clients since our genesis block. Desktop wallets are essential to the growth of SVR Coin, as it is only through these means that Masternode collateral is able to be locked and Masternodes enabled. SVR Coin staking functionality, as outlined in the “SVR Masternode” and “Proof of Stake” sections that follow, are only currently available in the desktop wallet applications while mobile wallets are under development. Transparency is essential and all anonymous transaction details, including staking, and the number of Masternodes online are available on the official SVR Explorer <https://explorer.sovranocoin.com>. As an added measure to prevent hyperinflation, each transaction fee on the SVR Blockchain is burned in its entirety. Each of the 4 desktop wallet versions are available for download on GitHub.

## **PROOF OF STAKE**

One additional way to generate SVR coins is to hold one SVR coin in any of our clients or Wallets. There is no collateral involved, meaning that one does not need to buy a specific amount of SVR Coins for this block reward split. It is also not necessary for one to lock their wallet for staking. The rewards are distributed by network weight; therefore, if one wishes to attain block rewards at higher frequencies, they will require more SVR Coins. The more coins one has, the likelihood that they will be able to mine the current block of SVR Coin. This opens our doors to every user, no matter their financial capacity to get rewarded just by holding a coin.

## **MOBILE WALLETS**

To further promote international merchant adoption, we are working on both Android and iOS Mobile wallets. The SVR Mobile Wallet application will allow users to quickly and easily send, receive and store SVR Coins on their mobile smartphone. Users enjoy the ability to use a QR code to simply send or receive SVR between mobile wallets. This opportunity will provide a means of receiving and sending SVR coins on the go!

This allows merchants to receive mobile payments seamlessly and instantly for their goods and services. By using the SVR Mobile Wallet, one will be able to quickly send SVR between both mobile and desktop wallet applications as well. As with the desktop wallets, all transaction fees for SVR Coin are burned from the total circulating supply of the coin, helping reduce hyperinflation, and increasing the longevity of the currency. Mobile staking and block reward generation is currently under development due to popular demand.

## **MERCHANT ADOPTION**

The ultimate value of any cryptocurrency in the function of money is measured in its adoption and use cases worldwide, by both merchants and customers for daily transactions.

SVR Coin's utility, speed and security has made the coin very endearing, thereby increasing global acceptability as a means of payment in businesses worldwide. Presently, SVR Coin is used to purchase VPS and will also be used to purchase Diamond, Gold and more which can be shipped to any location of choice worldwide at a cost. SVR's multiple open markets trading pair other cryptocurrencies like BTC, ETH, USDT etc., lowers the barrier of entry, and provides merchants in locations where fiat is struggling, to earn and receive currency of value for their goods and services. SVR provides a credible alternative.

## Disclaimer

We will like to categorically state that the information contained within this White Paper, as well as contents on our Discord channels, along with the SVR Coin website and Forum, Facebook, Twitter, Instagram, BitcoinTalk Announcement or Telegram channels and any other channel (mentioned or not) shall not be construed to be financial, legal or tax advice in any form. The content of this White Paper and all other SVR Coin contents are just informative material to enable potential investors make decisions based on their research and the features of our project.

Every content on SVR Coin's Discord server, its categories and channels, along with all SVR Coin social media and web contents, do not guarantee any particular outcome due to the volatility of the cryptocurrency market conditions.

It is also worthy to note that past performances does not indicate future results whether good or bad. This is not an offer to sell securities. SVR Coin is not a security. SVR Coin is 100% P2P decentralized open source currency run by a credible team of developers. Never invest more than you can afford to lose.

You should consult with your professional advisors before purchasing any cryptocurrencies. If you wish to trade on any exchanges, please only do so at your own risk. The core team of SVR is not responsible for your decision to trade or any losses incurred from trading on any platform whatsoever.

## **SOVRANOCOIN (SVR) PARTNERS ALBERTI GIOIELLI (S.R.L.)**

Over the last few months owing to the disruption caused by the rise of blockchain technology, which has seen consumers purchasing goods with cryptocurrency, and merchants doing all they can to make sure they integrate cryptocurrency payments for their goods just to satisfy customers who are eager to be anonymous during transactions and this has brought about a great turn of events in the financial world.

Most blockchain projects have successfully integrated into institutions, merged with wholesale and retail companies thereby enabling consumers to use cryptocurrency to purchase goods, in this light Sovranocoin has not been left out in this development.

Sovranocoin (SVR) has been revolutionary from inception, launched by founders of Smartchain technology after a successful outing with Goldiamcoin, innovation saw them moving to a Proof of Stake + Masternode to enable investor make profit in the easiest way possible. The SVR coin project makes it easy to own and run a Masternode, all a user has to do is download a desktop client, purchase a required amount of SVR coin to run a Masternode and then launch your Masternode.

To further increase the value of the SVR coin through usability by consumers and adoption by merchants, the Co-founder Mr. Walid Messaoudi through his firm Bitluxury Company Slovenia have signed a Memorandum of Understanding with Mr. Massimo Alberti, CEO of Alberti Gioielli (S.R.L.), a jewelry manufacturing company in Valenza, Province of Alessandria, Italy.

This new development will enable the Sovranocoin community and anyone across the globe holding SVR coin to purchase 0.3 carat diamond stones GIA certified, using SVR coin and have it delivered to them in any location of their choice at a shipping cost. This is great news to the Sovranocoin project and her community as the project hits another milestone. There are yet several milestones on the roadmap to be achieved, but this agreement for SVR adoption is an indicator for more to come.

The project founders expect that with this new development the SVR community and investor will be poised to do more and continue supporting the team as there are yet other milestones to be announced in no distant time.

# ALBERTI

— Tailored for your dreams —

Dear sirs,

with this letter we inform you about the business relationships between:

ALBERTI GIOIELLI SRL

CIRCONVALLAZIONE OVEST CO.IN.OR.

Lotto 14 Bb 34

15048 VALENZA (AL) ITALY

an Italian jewellery manufacturing company located and operating in Valenza, Italy

and the company:

BITLUXURY D.O.O

Dunajska cesta 136

SI- 1000 LJUBLJANA

SLOVENIJA

a slovenian company located and operating in Ljubljana, interested in precious stones trading.

Alberti Gioielli srl  
Massimo Cova

*ALBERTI Gioielli S.r.l.*

*Circonvallazione Ovest CO.IN.OR. , Lotto 14Bb , 34 - 15048 Valenza AL - Italy -*

*Tel. 0039/0131/924040 - Fax 0039/0131/946968 - E-mail info@albertigioielli.it - www.albertigioielli.it*

*V.A.T. Number IT 0143557 006 2 - Trade Mark AL 3231*
